Free Concussion Program! Moscow Parks and Recreation strives to help everyone maintain a healthy, active lifestyle. To maintain this type of lifestyle, we have teamed up with MMSPT to offer this program. Did you know that research indicates that by the time an athlete’s high school playing career is complete, more than 60 percent of all teenage athletes will have experienced some type of concussive injury? These are the known cases. Thousands more go unreported. And, did you realize that female soccer players are second only to football players in the incidence of concussions? Moscow Mountain Sport & Physical Therapy in association with Moscow Parks and Recreation is offering FREE ImPACT testing for all area athletes, 7th grade and older. ImPACT is a research-based computer test developed to help clinicians evaluate an athlete's recovery following concussion. In the pre-season, each athlete is given a baseline test. When a concussion is suspected during the season, a follow up test is administered to see if their results have changed from the baseline. The comparison helps physicians diagnose and manage concussions including determining when it is safe to return an athlete to play. Athletes under the age of 19 in particular are at risk for Second Impact Syndrome (SIS). All sports and athletes welcome. Tests are just 45 minutes in length. We can do individual testing, or arrange for an entire team to be tested.
