COMMENTS: Elevation of 2599.6 is for finish floor of attached garage. Finish Floor Elevation of home is at 2600.74.

This portion of the floodplain was re-studied in 1991. A map revision has been prepared and accepted by the regional office of FEMA that removes the area from the Flood Plain. However, this has not been adopted by the National office of FEMA. At the time of adoption, this house should be entirely out of the flood plain area.

The diagrams above illustrate the points at which the elevations should be measured in A Zones and V Zones. Elevations for all A Zones should be measured at the top of the reference level floor. Elevations for all V Zones should be measured at the bottom of the lowest horizontal structural member.
